AMITY UNIVERSITY UTTAR PRADESH
GAUTAM BUDDHA NAGAR
Amity University aims to achieve academic excellence by providing multi-faceted education to students and encourage them to reach the pinnacle of success. The University has designed a system that would provide rigorous academic programme with necessary skills to enable them to excel in their careers.

This booklet contains the Programme Structure, the Detailed Curriculum and the Scheme of Examination. The Programme Structure includes the courses (Core and Elective), arranged semester wise. The importance of each course is defined in terms of credits attached to it. The credit units attached to each course has been further defined in terms of contact hours i.e. Lecture Hours (L), Tutorial Hours (T), Practical Hours (P). Towards earning credits in terms of contact hours, 1 Lecture and 1 Tutorial per week are rated as 1 credit each and 2 Practical hours per week are rated as 1 credit. Thus, for example, an L-T-P structure of 3-0-0 will have 3 credits, 3-1-0 will have 4 credits, and 3-1-2 will have 5 credits.

The Curriculum and Scheme of Examination of each course includes the course objectives, course contents, scheme of examination and the list of text and references. The scheme of examination defines the various components of evaluation and the weightage attached to each component. The different codes used for the components of evaluation and the weightage attached to them are:

GUIDELINES FOR PROJECT FILE

Research experience is as close to a professional problem-solving activity as anything in the curriculum. It provides exposure to research methodology and an opportunity to work closely with a faculty guide. It usually requires the use of advanced concepts, a variety of experimental techniques, and state-of-the-art instrumentation.

Research is genuine exploration of the unknown that leads to new knowledge which often warrants publication. But whether or not the results of a research project are publishable, the project should be communicated in the form of a research report written by the student.

The project should build the attributes like intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, and sense of responsibility.

1. SCOPE
The relevant topic has to be defined with the mutual consent with your guide. The project is to study the selected problem, quality and shortcomings of available solutions. Your project must also include any new solution you can think of and general comments on why the problem is important. It is important to note that it takes time to write a good report.

2. TOPIC
It is the sole discretion of your faculty guide to allot you a topic for the project. If you have been thinking of some topic over a period of time and do the research work on the same, than it has to be with the consent of your guide.
Normally, the topic must be picked carefully keeping in mind
✓ Related to one or more subjects or areas of study within the core program.
✓ Clearly focused so as to facilitate an in-depth approach for finding the solution.
✓ Subject to availability of relevant information and to you knowledge
✓ Relevant to the current business scenario
✓ It is of interest to you and will lead to you all round development.

3. PLANNING YOUR PROJECT
The planning of the project is always recommended since it is an outline of what you intend to do. It will schedule you working and act as a guideline right from the outset.
The planning should entail the following:
✓ Defining aims and objectives of the project
✓ Formulating questions to be investigated
✓ Calculating the feasibility of the investigations.
✓ Working out various stages of the project
✓ Devising a time table to see the timely completion of different stages as per the schedule.

Benefits of planning
✓ Formulating a plan is creating an ideal model of your project, thus builds up your confidence.
✓ Make aware your guide to provide constructive comments as each stage of your project and provide you appropriate feedback of your work.
✓ It helps you concentrate on your thoughts.
✓ A plan can act as a guideline which helps you to keep check with the proceedings and direction.

4. MAKING A PROJECT DIARY
This includes the following:
✓ Making a note of everything you read; including those discarded.
✓ Ensuring that when recording sources, author’s name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
✓ Make clear what is a direct a direct quotation and what is your paraphrase.

5. GUIDELINES FOR A PROJECT FILE/REPORT
The file aims to encourage keeping a personal record of your learning and achievement throughout the project.
The file is a document that helps the evaluator assess your analytical skills & ability and present the evidence of the serious work carried out by you.
In general, file should be comprehensive and include:
A short account of the activities that were undertaken as part of the project;
A statement about the extent to which the project has achieved its stated goals.
A statement about the outcomes of the evaluation and dissemination processes engaged in as part of the project;
Any activities planned but not yet completed as part of the project, or as a future initiative directly resulting from the project;
Any problems that have arisen that may be useful to document for future reference.

6. LAYOUT OF THE PROJECT/FILE
The format of the report should comprise of the following components

1. Title/cover page
   It should detail the project title, student’s name, course, year, guide name, date of submission (As per the format in annexure-1)

2. Acknowledgements
   Acknowledgement to any advisory / financial assistance received while working on the project may be given.
The writer recognizes his indebtedness for guidance and assistance of the advisor/guide. Courtesy demands that he also recognize specific contributions by the other persons and institutions like libraries. Acknowledgements should be expressed very simply.

3. Abstract
   An abstract is a brief or condensed statement by the writer, or the essential ideas of the writer’s work. It should be straight to the point, not too descriptive but highly informative. It is a statement of the problem, a summary of the scope, methods and procedures, findings and results of the project.

4. Table of contents
   This gives page references for each chapter and section. Titles and subtitles are to correspond exactly with those in the report.

5. Introduction
   This brief documentation provides with the following facts about the project
   - The background of the project,
   - The objectives of the project
   - The rationale for the project
   - The limitations of the project should also be listed.

6. Materials and methods
   This section should aim at the methodology, research design, sampling and fieldwork (if any)
   Research methodology should be explained including modifications if any
   Reflect the reliability and validity of the methods
   Analysis and interpretation is to be shown.

7. Result and discussions
   In this section emphasis should be laid down on
   - What is performed and achieved in the project rather that the available literature in the context of the project.
   - Discussion on your results with reference to the literature review.
   - Matching your own results against what was established in the literature review. From this you should draw conclusion and make comments.
   - Add value to the results with your own comments
   - Highlight and provide analysis of any new themes that have emerged from your own research.

8. Conclusions and recommendations
   In this section the outcome of the work is mentioned briefly. This should be a conclusion to the whole project. Check that your work answers the following questions:
   - Did the research project meet its aims (check back to introduction for stated aims)?
   - What are the main findings of the research?
   - Are there any recommendations?
   - Do you have any conclusion on the research process itself?

9. Future prospects
   This section must give clear picture of where should further research be focused and for what other projects this project could be taken as input?
10. Appendices
It contains the material which is of interest to the reader but not an integral part of the project and statements of pros and cons that may be useful to document for future reference.

11. References
In this section you should give a list of all the references you have used. This should be cross referenced with you text. This includes papers and books referred to the body of the report.
For books, the following details are required:
For articles from journals,

7. ASSESSMENT OF THE PROJECT FILE
The weightage of the report will be based on the following criteria
✓ The quality of the report.
✓ The technical merit of the project which attempts to access the depth of the intellectual efforts put into the project.
✓ The project execution is concerned with how much work has been put in.
The file should fulfill the following assessment objectives
✓ Has the student made a clear statement of the objective or objective(s)?
✓ If there is more than one objective, do these constitute parts of a whole?
✓ Has the student developed an appropriate analytical framework for addressing the problem at hand?
✓ Is this based on up-to-date developments in the topic area?
✓ Has the student collected information / data suitable to the frameworks?
✓ Are the techniques employed by the student to analyze the data / information appropriate and relevant?
✓ Has the student succeeded in drawing conclusion form the analysis?
✓ Do the conclusions relate well to the objectives of the project?
✓ Has the student been regular in his work?
✓ Is the layout of the written report is as per the format?

8. EVALUATION SCHEME
The total weightage of the Project is 100 Marks. The evaluation of the project should be as per the following heads
✓ Faculty Guide  20
✓ Viva  20
✓ Presentation  20
✓ Report  40
  Content and layout  10
  Conceptual framework  10
  Objectives and methodology  10
  Implication and conclusions  10

GUIDELINES FOR INTERNSHIP FILE

There are certain phases of every Intern’s professional development that cannot be effectively taught in the academic environment. These facets can only be learned through direct, on-the-job experience working with successful professionals and experts in the field. The internship program can best be described as an attempt to institutionalise efforts to bridge the gap between the professional world and the academic institutions. Entire effort in internship is in terms of extending the program of education and evaluation beyond the classroom of a university or institution. The educational process in the internship course seeks out and focuses attention on many latent attributes, which do not surface in the normal classroom situations. These attributes are intellectual ability, professional judgment and decision making ability, inter-disciplinary approach, skills for data handling, ability in written and oral presentation, sense of responsibility etc.

In order to achieve these objectives, each student will maintain a file (Internship File). The Internship File aims to encourage students to keep a personal record of their learning and achievement throughout the Programme. It can be used as the basis for lifelong learning and for job applications. Items can be drawn from activities completed in the course modules and from the workplace to demonstrate learning and personal development.

The File will assess the student’s analytical skills and ability to present supportive evidence, whilst demonstrating understanding of their organization, its needs and their own personal contribution to the organization.

The layout guidelines for the Internship File

- A4 size Paper
- font: Arial (10 points) or Times New Roman (12 points)
- line spacing: 1.5
- top and bottom margins: 1 inch/ 2.5 cm; left and right margins: 1.25 inches/ 3 cm

The File will include five sections in the order described below. The content and comprehensiveness of the main body and appendices of the report should include the following:

1. **The Title Page** -- Title - An Internship Experience Report For (Your Name), name of internship organization, name of the Supervisor/Guide and his/her designation, date started and completed, and number of credits for which the report is submitted.

2. **Table of Content** -- an outline of the contents by topics and subtopics with the page number and location of each section.

3. **Introduction** -- short, but should include how and why you obtained the internship experience position and the relationship it has to your professional and career goals.

4. **Main Body** -- should include but not be limited to daily tasks performed. Major projects contributed to, dates, hours on task, observations and feelings, meetings attended and their purposes, listing of tools and materials and their suppliers, and photographs if possible of projects, buildings and co-workers.

5. **Appendices** -- include pamphlets, forms, charts, brochures, technical and descriptive literature, graphs and other information related to your Internship experience.

The Main Body will have three sections and will include the following items which will be evaluated for the final assessment:-

1. An analysis of the company/organization in which the student is working
2. A personal review of the student’s management skills and how they have been developed through the programme.
3. The research report that the student has prepared on the project assigned to him by the organization. (Incase a student is not assigned a specific research project in the organization, he has to select any one aspect of the organization and prepare a research report on it).

ASSESSMENT OF THE INTERNSHIP FILE

The student will be provided with the Student Assessment Record (SAR) to be placed in front of the Internship File. Each item in the SAR is ticked off when it is completed successfully. The faculty will also assess each item as it is completed. The SAR will be signed by the student and by the faculty to indicate that the File is the student’s own work. It will also ensure regularity and meeting the deadlines.

The Aims of the Dissertation
The aim of the dissertation is to provide you with an opportunity to further your intellectual and personal development in your chosen field by undertaking a significant practical unit of activity, having an educational value at a level commensurate with the award of your degree.

The dissertation can be defined as a scholarly inquiry into a problem or issues, involving a systematic approach to gathering and analysis of information/data, leading to production of a structured report.

The Dissertation Topic
It is usual to give you some discretion in the choice of topic for the dissertation and the approach to be adopted. You will need to ensure that your dissertation is related to your field of specialisation.

Deciding this is often the most difficult part of the dissertation process, and perhaps, you have been thinking of a topic for some time.

It is important to distinguish here between ‘dissertation topic’ and ‘dissertation title’. The topic is the specific area that you wish to investigate. The title may not be decided until the dissertation has been written so as to reflect its content properly.

Few restrictions are placed on the choice of the topic. Normally we would expect it to be:
- relevant to business, defined broadly;
- related to one or more of the subjects or areas of study within the core program and specialisation stream;
- clearly focused so as to facilitate an in-depth approach, subject to the availability of adequate sources of information and to your own knowledge;
- of value and interest to you and your personal and professional development.

Planning your dissertation
This will entail following:
- Selecting a topic for investigation.
- Establishing the precise focus of your study by deciding on the aims and objectives of the dissertation, or formulating questions to be investigated. Consider very carefully what is worth investigating and its feasibility.
- Drawing up initial dissertation outlines considering the aims and objectives of the dissertation. Workout various stages of dissertation.
- Devising a timetable to ensure that all stages of dissertation are completed in time. The timetable should include writing of the dissertation and regular meetings with your dissertation guide.

The dissertation plan or outline
It is recommended that you should have a dissertation plan to guide you right from the outset. Essentially, the dissertation plan is an outline of what you intend to do, chapter wise and therefore should reflect the aims and objectives of your dissertation.

There are several reasons for having a dissertation plan
- It provides a focus to your thoughts.
- It provides your faculty-guide with an opportunity, at an early stage of your work, to make constructive comments and help guide the direction of your research.
- The writing of a plan is the first formal stage of the writing process, and therefore helps build up your confidence.
- In many ways, the plan encourages you to come to terms with the reading, thinking and writing in a systematic and integrated way, with plenty of time left for changes.
- Finally, the dissertation plan generally provides a revision point in the development of your dissertation report in order to allow appropriate changes in the scope and even direction of your work as it progresses.

Keeping records
This includes the following:
- Making a note of everything you read; including those discarded.
• Ensuring that when recording sources, author’s name and initials, date of publication, title, place of publication and publisher are included. (You may consider starting a card index or database from the outset). Making an accurate note of all quotations at the time you read them.
• Make clear what is a direct a direct quotation and what is your paraphrase.

**Dissertation format**

All students must follow the following rules in submitting their dissertation.
• Front page should provide title, author, Name of degree/diploma and the date of submission.
• Second page should be the table of contents giving page references for each chapter and section.
• The next page should be the table of appendices, graphs and tables giving titles and page references.
• Next to follow should be a synopsis or abstract of the dissertation (approximately 500 words) titled: Executive Summary.
• Next is the ‘acknowledgements’.
• Chapter I should be a general introduction, giving the background to the dissertation, the objectives of the dissertation, the rationale for the dissertation, the plan, methodological issues and problems. The limitations of the dissertation should also be hinted in this chapter.
• Other chapters will constitute the body of the dissertation. The number of chapters and their sequence will usually vary depending on, among others, on a critical review of the previous relevant work relating to your major findings, a discussion of their implications, and conclusions, possibly with a suggestion of the direction of future research on the area.
• After this concluding chapter, you should give a list of all the references you have used. These should be cross - references with your text. For articles from journals, the following details are required e.g.

For books, the following details are required:

• Finally, you should give any appendices. These should only include relevant statistical data or material that cannot be fitted into the above categories.

**Guidelines for the assessment of the dissertation**

While evaluating the dissertation, faculty guide will consider the following aspects:

• Has the student made a clear statement of the objective or objective(s).
• If there is more than one objective, do these constitute parts of a whole?
• Has the student developed an appropriate analytical framework for addressing the problem at hand.
• Is this based on up-to-date developments in the topic area?
• Has the student collected information / data suitable to the frameworks?
• Are the techniques employed by the student to analyse the data / information appropriate and relevant?
• Has the student succeeded in drawing conclusion form the analysis?
• Do the conclusions relate well to the objectives of the project?
• Has the student been regular in his work?
• Layout of the written report.
